PROJECTS

- Decentralized Learning Management System** | *Java, Spring Boot, Microservices, React, MySQL, MongoDB*
- Engineered a highly scalable, microservices-based learning marketplace utilizing a 3-tier architecture to ensure modularity and high availability.
 - Developed robust backend services with Java and Spring Boot, integrating a dual-database approach using MySQL for structured user data and MongoDB for content management.
- AI Cricket Commentator** | *Java, Spring Boot, Chrome Extension, Web Audio API, Gemini AI, MongoDB*
- Developed a Spring Boot backend and Manifest V3 Chrome Extension that dynamically extracts live cricket match data from the DOM, generating context-aware multilingual commentary using Gemini 2.5 and ElevenLabs.
 - Engineered a zero-latency dual-audio system utilizing the Web Speech API for instant filler narration and a custom Web Audio API crowd noise synthesizer that programmatically triggers dynamic crowd roars synced with the commentary.

CERTIFICATIONS

- Fullstack Developer Certificate** | *PW Skills*
- Certified in end-to-end web development focusing on scalable MERN stack architectures.
